

IN-HOUSE VS. **OUTSOURCE**

Which path is best for your software security journey?

TO LOWER RISK OF A SUCCESSFUL CYBER ATTACK

47% OF APPLICATION SECURITY LEADERS FEEL EFFECTIVENESS MUST IMPROVE.¹

SECURITY TEAMS ARE SHOWING SIGNS OF STRAIN

SECURITY COMPROMISES ARE TAKING LONGER TO FIX

MORE THAN **1 DAY** TO FIX

MORE THAN **1 WEEK** TO FIX

SECURITY STAFF ARE EXPENSIVE AND DIFFICULT TO HIRE

The worldwide shortage of information security professionals is at **1 MILLION** openings.³

62% of companies have too few information security professionals, up from 56% two years ago.⁴

Each in-house security expert earns **\$100-\$150K** + benefits and can only work on one test at a time.⁵

YOU HAVE A CHOICE

IN-HOUSE

MAY BE BEST IF...

- You have few, limited applications.
- Demand for security testing is constant.
- Expert salaries and testing tools fit your budget.
- Staff have skills to find and fix security defects.
- You have headcount and recruiting capability.
- Staff can test and fix issues when needed.
- You prefer to hire and manage staff.

OUTSOURCING

MAY BE BEST IF...

- Your portfolio is extensive and complex.
- Demand for security testing is inconsistent.
- External experts with multiple tools cost less.
- You need support finding and fixing vulnerabilities.
- You want an unlimited pool of experts.
- A partner can match the pace of development.
- A partner gives you control and transparency.

You don't need to choose between **in-house** expertise and **outsourcing** application security testing

MANAGED SERVICES LETS YOU HAVE BOTH

Leave run-of-the-mill testing to your partner and focus your team on specialized tests or high profile applications

Let your partner handle all application security testing, while you focus on high-level strategy and management

MANAGED SERVICES PROVIDE ESSENTIAL SUPPORT TO HELP COMPANIES MINIMIZE SECURITY RISK

47% of companies use managed services for cybersecurity, up from 43% in 2014.⁶

CHOOSE THE RIGHT PARTNER

Secure the applications that power your business at scale, with the flexibility and control you need.
